

Chetak

Basic military version

In the military variant, the rugged platform of Chetak has been equipped with communication, navigation and role equipment. These make Chetak helicopter a versatile performer for air observation roles, troop transportation, cargo transportation and logistic support in difficult terrains.

For anti-tank warfare, scanning and identification of targets are accomplished by a gyro-stabilised monocular sight mounted on the cabin roof. Armament can include torpedoes, guns and air-to-surface wire-guided missiles. The automatic starting system gives the Chetak an uncommon instant start capability that cuts down the time from start to take-off to less than a minute.

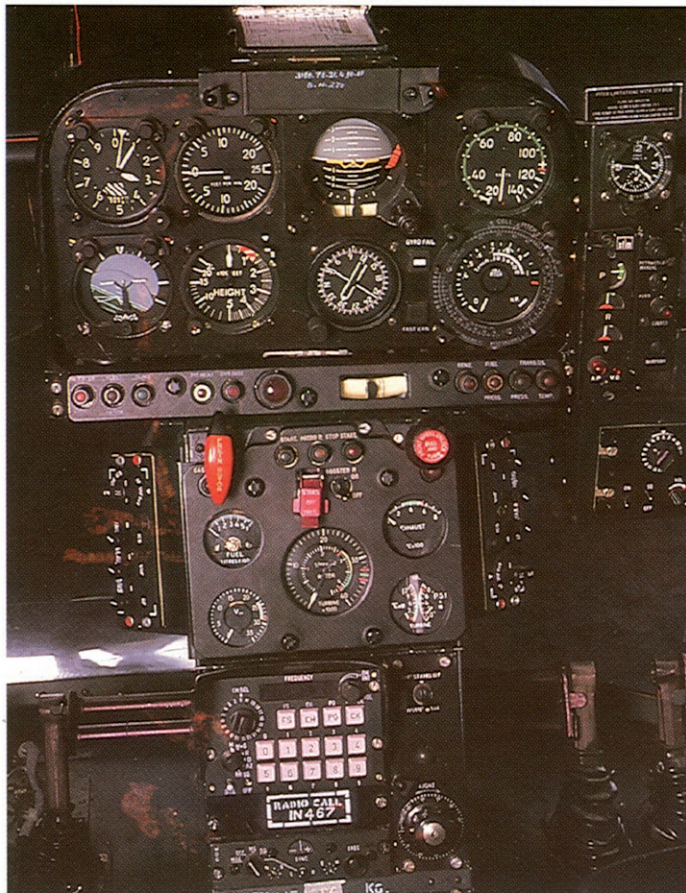

In the basic military version, following avionics are the standard fit:-

- ▶ V/UHF communication system VUC 201A
- ▶ Automatic direction finder ARC-610A
- ▶ Inter communication system TFAP 6F
- ▶ Cargo sling.

The other optional equipment are:

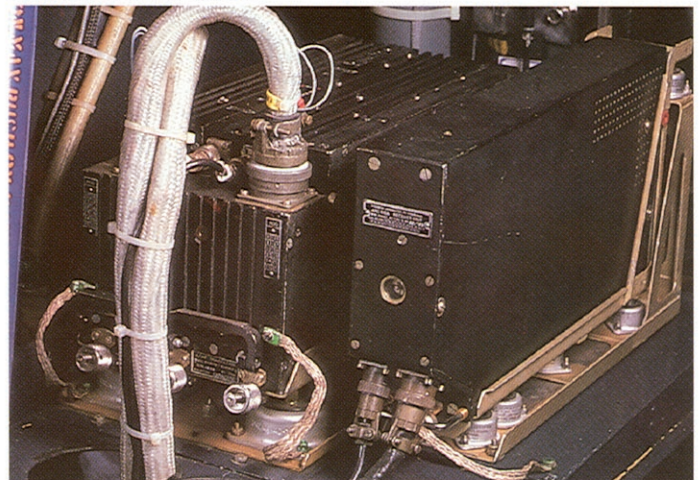

- ▶ Missile launchers
- ▶ Anti sand filters
- ▶ Doppler navigation system
- ▶ Rescue hoist
- ▶ Floatation gear
- ▶ Gun mounting.

Automatic direction finder ARC 610A and communication system V/UHF type VUC-201A

Loop antenna for ADF receiver

Antenna for VUC-201A

Gun mounting
